

Sustainable Nyack Action Plan 2015-2016 presentation – 2/12 at 6:30pm

Nyack's Sustainability Desk will present the Sustainable Nyack Action Plan 2015-2016 at the Village Board Workshop Session February 12, at 6:30 pm at Nyack Village Hall.

Village officials, staff, and community members developed the plan over the past year. It sets out actions for the careful and informed stewardship of economic, social and environmental resources in all aspects and sectors of Nyack village life.

The Action Plan is a roadmap for key steps for creating a community that is **sustainable**—one that balances interdependent economic, social and environmental needs in a lasting way, and **resilient**—prepared for and adaptable to the impacts of climate change.

Come out to hear about the plan and find out how you can be involved in the action!
